

200 LITRE STAINLESS STEEL TOTE BIN

STAINLESS STEEL TOTE BIN FOR USE IN THE FOOD & PHARMACEUTICAL INDUSTRY

200 LITRE STAINLESS STEEL TOTE BIN DESCRIPTION

The 200 Litre Stainless Steel Tote Bin was specially designed and developed for use in the Food and Pharmaceutical Industries which has dictated various features. The 200 Litre Stainless Steel Tote Bin has a 200 litre capacity, is mobile on nylon wheels and has strong stainless steel lifting lugs. The stainless steel lifting lugs allow the 200 Litre Stainless Steel Tote Bin to be lifted and tipped in standard bin tippers, including the tippers available from Base Handling Products.

In addition, the 200 Litre Stainless Steel Tote Bin is manufactured from stainless steel sheet and is a fully welded construction. The sides of the Stainless Steel Tote Bin are finished with a rolled edge to make the bin robust and give a hygienic finish. The Stainless Steel Tote Bin has a welded pushing handle which allows for easy wheeling and manoeuvring.

LIFTING LUGS	STAINLESS STEEL GRADE 304
LIDS	OPTIONAL EXTRA

200 LITRE STAINLESS STEEL TOTE BIN APPLICATION STORY

For the first time in the United Kingdom, the Stainless Steel Tote Bin is available with an electrolytically polished surface. In general, all stainless steel products and containers have surfaces which require a certain effort to clean. The polished surface of the Stainless Steel Tote Bin reduces the coarseness of the surface finish by up to 85%. This makes the Stainless Steel Tote Bin extremely hygienic and reduces the costs associated with cleaning including water, detergent and energy consumption.
